

ABISHEK MANICKAM

Supply Chain & Logistics Specialist | Transportation Engineering Professional

abishekmanickam.official@gmail.com | (+48) 794 203 501 | [linkedin.com/in/abishekmanickam](https://www.linkedin.com/in/abishekmanickam) | Warszawa, Poland | Open to Relocation Across Europe

PROFESSIONAL SUMMARY

Supply Chain & Logistics Specialist with 5+ years delivering 80% budget efficiency gains, 40% production output increases, and 12% transport cost savings across manufacturing and logistics operations. MSc in Transportation Engineering (Warsaw University of Technology). Skilled in SAP, OMP, Power BI, and Python competencies in active demand across logistics hubs in Germany, the Netherlands, Belgium, and the Nordics. EU-based in Warsaw.

AREAS OF EXPERTISE

Core Logistics: Supply Chain Management | Inventory & DRP Management | Warehouse Operations | OOG Transport | Multimodal Transportation | Returns Management

Planning & Optimisation: Demand Planning | Replenishment Flow Management | OMP Planning | MES Optimisation | Process Improvement | Technical Audit Management

Data & Systems: SAP | Power BI | Python | SQL Server | Microsoft Azure | R Programming | Oracle ERP | MS Dynamics | AutoCAD

Soft Skills: Cross-functional Collaboration | Supplier Negotiation | Customer Service | Project Management | Compliance & Safety

CAREER HIGHLIGHTS

- Increased process output by 23% by engineering demand-driven OMP planning projects to resolve supply chain bottlenecks.
- Improved budget utilisation by 80% by developing a Python-based inventory optimisation system using the PuLP linear programming library.
- Boosted production output by 40% by implementing innovative operational structures and cross-functional workflow redesign.
- Achieved 30% improvement in system performance and 27% reduction in downtime by upgrading server and network infrastructure.
- Delivered 35% cost savings and 40% operational efficiency gain through ERP implementations across Oracle, SAP, and MS Dynamics platforms.

PROFESSIONAL EXPERIENCE

Junior Networking Intern

Jan 2023 – Oct 2023

JNS Sp. z o.o. | Lodz, Poland

- Reduced network downtime by 27% and improved system performance by 30% by upgrading server infrastructure, maintaining VoIP systems, and optimising network transmission protocols.
- Increased operational efficiency by developing custom Power BI dashboards and internal digital tools used across network monitoring and reporting workflows.
- Produced structured, recipient-oriented performance reports from raw network data to support decision-making by technical and management stakeholders.

Project Management Associate

Aug 2019 – Oct 2021

V.P. Engineering & Logistics Ltd. | Tamil Nadu, India

- Increased process output by 23% by analysing demand patterns and engineering OMP-based supply chain projects that aligned inventory strategy with daily inbound and replenishment flows.
- Reduced procurement costs and increased eco-friendly material usage by 15% by leading supplier negotiations aligned with sustainability and operational efficiency targets.
- Achieved 100% safety compliance across heavy equipment operations by conducting comprehensive technical audits and enforcing regulatory standards.
- Boosted production output by 40% by establishing and implementing innovative business structures and operational workflows across cross-functional teams.
- Identified 12% cost savings on selected trade lanes by supporting a multimodal transportation feasibility study across key supply routes.

Mechanical Design Engineer

Feb 2018 – Jul 2019

GMR Industries & Logistics Pvt. Ltd. | Tamil Nadu, India

- Achieved 90% revenue accuracy and 95% on-time delivery rate by collaborating with finance and sales teams to optimise order flow and logistics handoff processes.
- Reduced energy consumption by 15% and improved warehouse airflow efficiency by 30% by engineering and deploying upgraded HVAC systems.
- Delivered 35% cost savings and elevated operational efficiency by 40% through successful ERP implementations using Oracle, SAP, and MS Dynamics.
- Compiled daily operational data reports that identified and communicated 8% efficiency improvements, enabling data-driven decisions by management.

EDUCATION

MSc in Transportation Engineering & Management

Oct 2022 – Jul 2025

Warsaw University of Technology | Warszawa, Poland

BSc in Mechanical Engineering

Jul 2013 – Jun 2017

Anna University of Technology | Chennai, India

PROJECTS

Supply Chain Optimisation — Paula's Fruits and Foods Exports S.A. de C.V. Jan 2024 – Mar 2025

Freelance Supply Chain Consultant | Mexico City, Mexico (Remote) | Sector: Fresh Produce & Specialty Food Exports to EU

- Reduced excess inventory value by 25% by auditing full SKU flow from harvest to freight handoff, redesigning reorder cycles to align with seasonal EU import demand and introducing FIFO protocols with shelf-life tracking.
- Improved on-time delivery to EU customers from 79% to 96% — the highest OTD rate in company history by restructuring freight routing across three Mexico-to-EU corridors and introducing initiative-taking exception management.
- Cut freight and logistics expenditure by 18% by renegotiating carrier service-level agreements and consolidating routes across export corridors to Spain, Germany, and the Netherlands.
- Authored 10+ standard operating procedures covering customs coordination, cold-chain compliance, EU phytosanitary documentation, and carrier handoff protocols, significantly reducing staff onboarding time.
- Strengthened vendor and carrier relationships by implementing structured review processes with key freight forwarders and customs brokers, improving supply chain resilience and accountability.

Verified outcomes — Letter of Achievement issued by Paula's Fruits and Foods Exports (Ref: PFFE/LOA/SCM/2025-017, March 2025)
